This study looks at the major opportunity to produce energy from sewage wastewater in Khartoum State in Sudan. The sewage wastewater and the associated biomass are estimated and ...

Shijiazhuang Zhengzhong Technology Co., Ltd. (Center Enamel), a global leader in glass-fused-to-steel (GFS) tank technology, is committed to supporting Sudan's progress by providing high-quality ...

There are two centralized wastewater treatment plants in Khartoum, Sudan that treat a combined capacity of 61,000 cubic meters per day. Decentralized plants also exist but coverage is low, ...

Feasibility and challenges of energy self-sufficient WWTPs are explored. Energy efficiency optimization is crucial for wastewater treatment plants (WWTPs) because of increasing ...

To achieve an energy self-sufficient municipal wastewater treatment, this chapter thus attempts to offer a clear understanding of the energy situation and challenges in current WWTPs,...

To cope with the problem of no or difficult grid access for base stations, and in line with the policy trend of energy saving and emission reduction, Huijue Group has launched an innovative ...

Introducing geothermal energy into Sudan's energy mix enhances grid resilience by reducing dependence on hydro and fossil fuel-based power, ensuring a more stable and diversified energy ...

This review provides an overview of the waste (water)-based energy-extracting technologies, their engineering performance, techno-economic feasibility, and environmental benefits.
