Why should you choose custom server racks & network cabinets?

Starting with flexible, easily installed, adaptable and pre-configured customized server racks and network cabinets saves you costs, footprint and it increases the performance, efficiency, and reliability of your critical infrastructure. Let's discover the data center custom containment solutions that help you reach your objectives.

What is included in a colocation data center?

Mesh walls, demarcation rack with patch panels, locking door, ladder rack and fiber raceway up to first cabinet position or up to 10 feet. Security accessories include dedicated cameras, biometric hand scanners and more. Built-to-order mesh cabinets and colocation data center cages with space assigned based on power allocations.

Are custom cabinet configurations available in International Business Exchange (TM) (IBX) data centers?

Custom cabinet configurations available in International Business Exchange (TM) (IBX) data centers globally. Fully enclosed, secured, and interconnected data center environments for custom, multi-cabinet deployments. Work with our industry-leading engineering experts to design, build, and optimize your critical data center environment.

What size server & network cabinets are available?

With the most extensive array of sizes ranging from 42-52RU, heights of 600mm to 800mm (23.62" to 31.5"), and depths of 36" to 54", providing server and network cabinets that meet any specific requirements.

Today, a typical data center consumes about 3-5kW per cabinet due to power and cooling concerns, while the available cabinet space can accommodate 15kW or more per cabinet if managed effectively.

Legrand offers a configure-to-order cabinet platform that offers best-in-class energy efficiency with ready-to-ship parts for shorter lead times and faster deployment. Data centers replace their IT ...
