Should wind and solar subsidies be double this year?

According to an analysis by Cornwall Insight, an energy consultancy, subsidies to the developers of wind and solar over the next two years need to be at least double this year's record level if the government is to reach its clean power goal by the end of the decade. The London Times reports:

Why are governments putting trillions into wind & solar subsidies?

Governments, especially in the West, are pouring trillions into subsidies for wind and solar despite their hidden costs, raising consumer costs and undermining economies.

Are there special solar incentives for low- and moderate-income families?

Many states have special solar incentives for low- and moderate-income (LMI) families and underserved communities. These programs often offer extra rebates, grants or financing to lower upfront costs and widen access to solar. For example:

How much does a solar system cost?

A typical residential solar panel system costs \$18,000 to \$43,000, depending on what incentives you're eligible for, the size of your system and other factors. Solar tax credits have historically benefited higher-income homeowners. Rebates and loan programs, on the other hand, have the potential to make solar power more accessible for everyone.

Renewable energy, particularly wind and solar power, is receiving substantial subsidies in many countries worldwide. Unfortunately, wind and solar energy are unreliable and very expensive, ...

Navigate solar incentives with our guide to government subsidies. Learn how tax credits, rebates, and grants can dramatically reduce installation costs.

DSIRE is the most comprehensive source of information on incentives and policies that support renewables and energy efficiency in the United States. Established in 1995, DSIRE is operated by ...
