Our 500 kW - 1 MW containerized commercial & industrial (C& I) energy storage system is engineered for large-scale applications such as factories, industrial parks, data centers, and microgrids.

Namkoo's containerized battery energy storage solution is a complete, self-contained battery solution for utility-scale energy storage. It puts batteries, A/C, UPS, inverter and auxiliary equipment in a single ...

Built using advanced Lithium-Iron Phosphate (LFP) cells, intelligent Battery Management Systems (BMS), and a fully integrated Energy Management System (EMS), our 1 MWh solution provides safe, ...

In addition to providing local power security, possessing energy management and automatic switching functions for microgrids, EMS also needs to consider participating in power demand side response ...

It is suitable for use in microgrids, in rural areas, in remote areas, or in large-scale manufacturing and farms, as well as for charging stations for electric vehicles.

Featuring a split PCS and battery cabinet design, it offers 1+N scalability and integrates seamlessly with solar PV, diesel generators, the grid, and utility power.

Battery Energy Storage System (BESS): Pre-designed 1MW/1MWh solution allows the site to operate for one (1) hour on off-grid mode while keeping necessary and critical loads powered up.

Namkoo's 1MW/2.4MWH Microgrid BESS provides a scalable, all-in-one energy storage solution for independent power grids. Integrates solar, diesel, and grid power with advanced high voltage battery ...
