Hear from our team and the Energy Market Authority (EMA) of Singapore on how this feat was achieved, and what it means for Singapore's sustainable energy future.

Through a partnership between EMA and SP Group, Singapore deployed its first utility-scale ESS at a substation in Oct 2020. It has a capacity of 2.4 megawatts (MW)/2.4 megawatt-hour (MWh), which is ...

The battery energy storage project is deployed on 2 hectares of land in Jurong Island, Singapore, a highly industrialized area with most of Singapore's energy production and infrastructure.

Singapore has surpassed its 2025 energy storage deployment target three years early, with the official opening of the biggest battery storage project in Southeast Asia.

Gur'n Energy is developing a pipeline of utility-scale battery energy storage system (BESS) projects to enable greater flexibility of the grid and support the increased use of renewable energy in Japan.

announced in a joint media release the opening of Sembcorp Energy Storage System ("ESS"), which is the largest ESS in Southeast Asia. The utility-scale ESS was commissioned in six months and ...

Singapore will achieve its target of having "giant batteries" to store at least 200MW of energy three years early. The 200MW system is currently being installed across two sites on Jurong ...

Singapore's government and Energy Market Authority (EMA) have announced power sector and grid enhancements, including a possible expansion of Southeast Asia's biggest battery ...
