What is a virtual power plant?

As a new energy-supply service solution to address massive, distributed energy access to the power system, a virtual power plant has higher transmission reliability and real-time communication requirements.

How to improve virtual power plant interaction?

To improve virtual power plant interaction, performance parameter mapping between communication and business technology, and multilevel virtual power plant interaction technology are proposed. Access to this full-text is provided by Wiley. This content is subject to copyright.

Can virtual power plants facilitate the integration of distributed energy resources?

J.C.Sarmiento-Vintimilla, E.Torres, D.M.Larruskain, M.J.P&#233;rez-Molina Applications, operational architectures and development of virtual power plants as a strategy to facilitate the integration of distributed energy resources *Energies*, 15(3)(2022), p.

Is virtual power plant a demand response aggregator?

VPP (P2030.14) - a managed aggregation of assets and resources forming an electric power plant capable of providing continuous power and energy using directly controlled assets including DER ...

As a new energy-supply service solution to address massive, distributed energy access to the power system, a virtual power plant has higher ...

Stabilizing the supply of power from inherently variable renewable energy sources such as solar and wind, and balancing it with a wide range of demand, presents the daunting challenge.

As a new energy-supply service solution to address massive, distributed energy access to the power system, a virtual power plant has higher transmission reliability and real-time...

business technology, and multilevel virtual power plant interaction technology ...

This chapter investigates the communication system architecture of VPPs, giving an overview of current communication technologies and communication protocols, which are illustrated with relevant ...

Advanced operational strategies are necessary to optimize power systems when integrating Distributed Energy Resources into power networks. To maximize...

In this paper, the communication protocol among those VPPs is designed to attain correct and efficient VPP operations. The protocol information and functions are discussed in local distributed environment.
