What is 8mm+8mm clear tempered laminated glass?

8mm+8mm clear tempered laminated glass also known as toughened laminated safety glass, is a kind of laminated glass, which is made of two layers of 8mm clear float glass after tempering process.

How to process 8mm+8mm clear tempered glass?

Details processing: 8mm+8mm clear tempered laminated glass can be processed accurately with polished edges, safety corner, drilling holes, cut outs to assemble with different types of accessories. 1.Laminated tempered glass belongs to interior stress glass.Before make lamination process, the glass need to cut in the molding, drilling and milling.

Is solar control glass a good option for a building?

The increased use of glass in architecture today makes it imperative to consider the comfort of a building's occupants. Solar control glass can be an attractive feature of a building whilst at the same time minimising, or even eliminating the need for an air conditioning system, reducing running costs of the building and saving energy.

How does glass manage solar heat radiation?

Glass manages solar heat radiation by three mechanisms: reflectance, transmittance and absorptance. These are defined as follows: Reflectance - the proportion of solar radiation reflected back into the atmosphere. Direct transmittance - the proportion of solar radiation transmitted directly through the glass.

The Pilkington Activ(TM) Range of products combines both self-cleaning and solar control properties, helping to keep the glass cleaner and clearer. The ideal glass solution for conservatories and ...

It provides safe walking in wet and dry conditions thanks to its non-slip surface specially designed for safety. The non-slip surface glass used in our products is 6 - 8 - 10 mm thick and has R10 - R11 ...

Let the light in with Mitrex Solar Glass -- a powerhouse in disguise, where photovoltaics meet limitless design, where color meets clarity. You're not just choosing glass; you're choosing a future where ...

8mm+8mm clear tempered laminated glass also known as toughened laminated safety glass, is a kind of laminated glass, which is made of two layers of 8mm clear float glass after tempering process.

PVB laminated glass is very tough, even when the thieves break the glass, the glass will firmly together to keep the integrity because of the middle layer.

8mm anti-slip solar glass
