Where are offshore wind farms located in Europe?

The main EU producers of offshore wind energy are Germany, the Netherlands, Belgium and Denmark. Explore the Map of the Week to see where offshore wind farms are located. The Offshore Renewable Energy Strategy proposes to increase Europe's offshore wind capacity to at least 60 GW by 2030 and to 300 GW by 2050.

How many offshore wind turbines are there in Europe?

Europe now has a total installed offshore wind capacity of 30.3 GW (March 2023). This corresponds to more than 5,954 grid-connected wind turbines in 126 offshore wind farms across 13 countries. European Government pledges to add up to 150 GW of offshore wind in the next decade to comply with Europe's climate ambitions.

What is the offshore wind ports platform?

But given the strategic importance of ports to fulfill the EU's goals for offshore renewable energy, the Offshore Wind Ports Platform advocates for European institutions and Member States to develop a strategy for the development of port infrastructure and mobilise financial instruments to support the necessary investments.

What is the European wind power package?

The European Commission introduced the European Wind Power Package in October 2023, which incorporates the European Wind Power Action Plan. This plan aims to streamline wind energy deployment by expediting processes such as permitting and auction design, with an emphasis on increasing investment in offshore wind and ocean energies.

With over 60 ports & terminals worldwide, DP World enables seamless trade flow through integrated multimodal connectivity, including sea, land, air, and digital solutions. If your country is not directly ...

Open map of the world's electricity, telecoms, oil, and gas infrastructure, using data from OpenStreetMap.

WindEurope (formerly known as The European Wind Energy Association) has estimated that 230 gigawatts of wind capacity will be installed in Europe by 2020, consisting of 190 GW onshore and 40 ...

This map is a comprehensive illustration of the transmission system network operated by members of the European Network of Transmission System Operators. Network elements are not located at their ...
