These all-metal enclosures provide protection for all your electronics and instrumentation needs. An extruded aluminum body and diecast aluminum end caps create an extremely durable yet lightweight ...

We have 40 extrusion production lines with varying tonnage capacities, specifically designed for the manufacturing of aluminum electronic enclosure boxes. These lines enable us to produce high ...

Our custom aluminum enclosures are designed to provide robust protection for sensitive electronics and industrial equipment, offering a durable, lightweight, and corrosion-resistant solution tailored to your ...

Custom extruded aluminum enclosures with 1U or 2U height profiles. Made with aluminum extrusions and panels. Ideal for PCB mounting with slotted rails. Six standard faceplate styles available. Fast ...

We use a precision extrusion process to shape aluminum into durable housings. Each enclosure shields your components from dust, impact, and spills. Sizes vary to fit small circuit boards, LED power ...

Extruded aluminum enclosures provide exceptional protection for PCBs and other electronic components. Designed with internal slots, these aluminum extrusion cases allow standard 0.063" ...

We offer a selection of aluminum extrusion enclosure profiles. You can make CUSTOM enclosures of any length quickly, easily and with LOW COST.

After extrusion, the profiles are cut to length and further processed with CNC machining to add slots, holes, threads, and assembly features, creating durable and dimensionally consistent enclosures for ...
