SEIA makes major solar project data available to the public through the map below. SEIA members have exclusive access to the list as a sortable, searchable MS Excel file that is updated monthly.

The US Bureau of Land Management (BLM), part of the Department of Interior (DOI), has approved several large-scale renewable energy projects in the US States of Nevada, Arizona and ...

In the second quarter of 2024, US developers put into operation 33 energy storage projects in 10 states with an installed capacity of 2.9GW. The cumulative installed capacity of energy ...

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW of new utility ...

The U.S. Department of Energy (DOE) today announced up to \$325 million for 15 projects across 17 states and one tribal nation to accelerate the development of long-duration energy ...

All three projects will be located in southern Nevada and are expected to be completed and serving customers by January 1, 2024. With the addition of these new projects, NV Energy will ...

The loan guarantee will finance the deployment of up to 1,000 solar photovoltaic (PV) systems and battery energy storage systems (BESS) located primarily at commercial and industrial ...

More than 1.1 GWh of energy storage, the majority of it developed alongside solar projects, is due to come online by the end of next year after three more big US funding announcements.
