When Apple announced its global facilities now run on 100% renewable energy, photovoltaic panel installation became the cornerstone of this environmental revolution.

Apple's spaceship-like headquarters in Cupertino, California, is adorned in solar panels, a testament to the company's pledge to power its facility with 100 percent renewable energy.

Apple's new HQ is approaching completion. What peaked interest into this mega-project was the footage that revealed solar panels covering almost the entire HQ.

Now Apple says it's finished getting the rest of its facilities running on 100% green power-from its new Apple Park headquarters, which has one of the largest solar roofs on the planet, to its distribution ...

As if Apple Inc. wasn't one of the leading sources of innovation in the world, they now plan to add a new roof project to their list of accomplishments. The Apple headquarters campus is planning to install a ...

Recently, the Qiongxi Photovoltaic Power Plant in Hongyuan County and the Zhuokun Photovoltaic Power Plant in Ruorgai County have started power generation. Either of them is a joint investment ...

In Japan, Apple is partnering with local solar company Daini Denryoku to install over 300 rooftop solar systems that will generate 18,000 megawatt-hours of clean energy every year -- ...

Apple aims to install or procure enough renewable electricity to match every watt used to charge its products by 2030. From adding rooftop solar panels at its corporate offices to partnering ...
