Is working in the solar industry a good career path?

Yes, working in the solar industry is a great career path for a number of reasons. A lot of jobs in the solar industry are easy to get started in, with most jobs in the manufacturing, installing, or sales sector not requiring a college degree. Not to mention, solar certification courses are very accessible; most of them can be completed online!

How do I get a job in solar energy?

Taking specific courses in solar or holding certifications will not only help you stand out to employers - they also could be a requirement for a position. Training courses offered by SEI and certificates from NABCEP are an excellent place to start. Some of the best solar training courses you can take are through Solar Energy International (SEI).

Where can I find solar jobs?

Don't waste your time searching through irrelevant jobs on sites like Indeed if you are interested in solar career opportunities. We've automatically pre-categorized jobs into relevant fields like "solar installers," "solar sales," and "solar technicians" so you don't have to worry about crafting the exact search.

What jobs are in the solar industry?

Electricians, plumbers, and solar photovoltaic installers install residential and commercial solar projects. The Solar Foundation estimates that the largest growth in the solar industry in 2011 will be in occupations in solar installation, including photovoltaic installers and electricians and roofers with experience in solar installation.

**Career Growth Opportunities:** Many solar panel technicians begin in entry-level installation roles and progress to site management, electrical work, system design, or project supervision. With ...
