Are solar panels allowed on planes?

Yes, portable solar panels are generally allowed on planes, but there are a few caveats to keep in mind. Most airlines permit solar panels as part of your carry-on or checked luggage. However, the size, weight, and type of the panel might determine whether additional restrictions apply.

Should solar panels be packed in carry-on luggage?

Packing solar panels in carry-on luggage can be ideal as it allows for better handling and reduces the risk of damage. Check the size limits for carry-on items set by your airline and make sure that your solar panel fits within these dimensions.

Can you bring a solar charger on a plane?

Batteries with up to 100 Wh are allowed on planes. However, if your solar charger battery has more than 100 Wh, you'll need special permission before bringing it on the plane. Even if you receive permission, you'll only be allowed to bring batteries with up to 160 Wh on the plane.

Can You Fly with solar panels?

When flying internationally with solar panels, passengers and airlines must adhere to the regulations set forth by IATA, especially concerning lithium batteries, which are commonly used in conjunction with solar panels. Portable solar panels with batteries must be carried in carry-on baggage.
