Can Japan share active and passive mobile infrastructure?

The idea of sharing active and passive mobile infrastructure is not new to Japan. In 2021 KDDI and Softbank got together to deploy Ericsson's Multi-Operator Radio Access Network to enable infrastructure sharing, notably in rural areas where the business case for building 5G networks is weak.

How is NTT reshaping the Japanese telecoms market?

NTT's recent sale of tower assets to JTower illustrates how a sharp decline in prices for consumer communications service is helping to reshape the Japanese telecoms market. Japan's largest telco will transfer ownership of 1,552 DOCOMO towers to JTOWER for JPY17 billion (USD114 million).

Are Japanese telcos selling tower assets?

And both KDDI and Rakuten Mobile have investments in JTower. Nonetheless, Japanese operators have come much later to selling tower assets than telcos in other geographies. And they have done so under some duress, according to Marc Einstein, Chief Analyst, Telecommunications & Digital Services, ITR.

How many DoCoMo towers will Japan's largest telco acquire?

Japan's largest telco will transfer ownership of 1,552 DOCOMO towers to JTOWER for JPY17 billion (USD114 million). It will subsequently lease back the towers with the goal of promoting infrastructure sharing. This follows an agreement in March 2022 between the two companies to transfer 6,002 towers to JTOWER.

Trina Solar's ESS isn't your grandma's solar battery. This AC-coupled system acts like a power traffic controller, seamlessly integrating with existing grid connections and solar arrays.

LZY Energy's Indoor Photovoltaic Energy Cabinets are solar-powered integrated equipment especially designed to meet the requirements of communication base station rooms.

These systems operate independently of the grid, using solar energy to power telecom cabinets. Their scalability allows you to customize the setup based on specific energy needs and site ...

As Japan's telecom sector evolves to meet Society 5.0 goals, solutions like Trina Solar ESS Hybrid Inverter Storage aren't just powering towers - they're reshaping the nation's digital infrastructure ...

A solar power inverter and battery system gives steady power to telecom cabinets, keeping them running

Are japanese solar telecom integrated cabinets shared
