Does homeowners insurance cover solar panels?

Yes, most homeowners insurance policies do cover solar panels, but the extent of coverage depends on several key factors including how they're installed, whether you own or lease them, and your specific policy terms.

Why is insurance important for photovoltaic plant operations?

Insurance is important to several aspects of photovoltaic (PV) plant operations. Insurance is often a prerequisite for financing, operating permits, interconnection agreements, and leases or as part of a power purchase agreement for an on-site PV system. The history of insurance for PV systems is short compared to other types of assets.

Do PV systems need insurance?

The history of insurance for PV systems is short compared to other types of assets. Property and casualty insurers have been providing coverage for risks for centuries--the first fire insurance policies had their origins in the Great Fire of London in 1666 (Insurance Information Institute 2020b).

Does homeowners insurance cover a PV system?

For residential photovoltaic (PV) systems, homeowners' insurance extends property coverage to the PV array and liability coverage to bodily injury to others or damage to the property of others that occurs as a result of the system.

The paper includes the results of an analysis of 6 years of property and casualty insurance claims for PV equipment and discusses considerations for purchasing property and casualty insurance for owners ...
