Our goal is - always based on your needs and expectations - to maximize the return on your investment and at the same time to minimize the total cost of acquiring and using your equipment. There will be ...

Solar power in Greece has been driven by a combination of government incentives and equipment cost reductions. The installation boom started in the late 2000s with feed-in tariffs has evolved into a market featuring auctions, power purchase agreements, and self-generation. The country's relatively high level of solar insolation is an advantage boosting the effectiveness of solar panels; within Europe, Greece re...
