---

Our portfolio includes not only automatic solar panel production lines, but also individual equipment for PV modules production, from glass loading equipment at the beginning to solar panel assembly and ...

In this era of automation, HORAD has developed a state-of-the-art fully automatic packing line for PV modules and solar panels. This innovative solution streamlines the packaging process, ensuring ...

To address this challenge, SC Solar has leveraged its years of R& D expertise and cutting-edge automation technologies to launch a fully automated PV module packaging line.

The full auto PV Module packaging line integrates auto inputting, auto flipping, auto packaging, auto corner protection, auto wrapping, and auto conveying, which solves the problems of low work ...

Designed for seamless integration into existing manufacturing processes, the Automatic Packing Line offers a modular approach that supports the unique requirements of individual solar panel ...

The robotic arm uses a special vacuum system to remove modules from the test ...

The ECOPACK R is designed to revolutionize solar module handling with its fully automatic packing system. Featuring a 6-axis robot and up to six pallets for detailed sorting based on module power ...

Our automated Solar/PV modules production line includes a complete set of equipment, such as solar cells laser cutting, string soldering, welding, glass loading, layup, laminating, framing, J-Box ...
