The renewables arm of South Korea's Samsung C& T Corp (KRX:028260) has secured terrain for the deployment of two battery energy storage system (BESS) projects in Texas, targeting ...

Batteries store energy during low demand periods and release it during high demand periods, providing greater reliability and stability to the Texas electric grid.

The Lower Rio and Bird Dog facilities, along with Ormat's existing 33MW/33MWh merchant energy storage operation, and the planned 100MW/200MWh Louisa project, will provide essential energy ...

Texas' energy grid is experiencing a technology revolution. The age of battery electric storage systems arrived virtually overnight, growing from only 275 megawatts in 2020 to more than ...

Over 8 GW of battery energy storage has been deployed on the ERCOT power system to date. "Battery storage is the fastest, scalable solution to provide reliability in the near-term to the...

Battery storage is becoming the unsung hero of the Texas power grid. As we lean more on wind and solar--and since our grid doesn't connect to the rest of the country--batteries help keep ...

Officials said the state added about 6.4 GW of energy storage capacity in 2024, and more than 12 GW of storage has been deployed on the ERCOT system to date. Officials have said ...

As this analysis clearly demonstrates, these battery storage resources are central to an all-of-the-above approach to energy independence, and a commonsense solution that brings greater ...
