At ENGIE, we are not only focused on reducing emissions but also establishing a clean, affordable, and dependable energy system for our customers.

We highlight the rise of standalone projects against hybrid solar-plus-storage systems, emerging government tenders, and key initiatives like the Red Sea Project and the South African ...

Application scenarios encompass large-scale power station storage (such as molten salt thermal storage and battery energy storage), emerging smart city energy management (e.g., NEOM), and supporting ...

This report explores the key dynamics shaping the battery market across the region: from the rise of lithium-ion and solid-state technologies to growing applications in energy storage, electric mobility, ...

The Middle East's journey towards energy diversification and sustainability is a story of vision, innovation, and collaboration. Energy storage solutions are at the heart of this narrative, ...

The key factors driving the Middle East battery energy storage systems (BESS) market include the rising integration of renewable energy, ambitious government decarbonization strategies, and the need for ...

As the region's battery ecosystem evolves, understanding the key players and their strengths becomes essential for stakeholders. This guide offers a comprehensive overview of leading ...

SunRise Arabia 2026 signals a new clean energy frontier The SunRise Arabia Clean Energy Conference 2026 is set for April 22, 2026 in Riyadh, bringing together policymakers, investors, ...
