How are battery tests conducted?

All battery tests are conducted in accordance with international standards and original equipment manufacturer (OEM) specifications including ISO, IEC, UN ECE, SAE, LV, AK and many more. We can also perform bespoke tests to customer requirements, if required. Electromobility is undergoing rapid technological change.

What does a Battery Testing Service do?

Testing services for battery cells, modules and entire systems, from small hybrids to full electric cars. The battery is the key component of the electric vehicle.

Do you test and certify your batteries?

We test and certify your batteries to various global battery testing standards including, but not limited to: IEC 62619 - Safety requirements for secondary lithium cells and batteries, for use in industrial applications. IEC 62660 - Secondary lithium-ion cells for the propulsion of electric road vehicles.
