Bulgaria installed 1,416 MW of new solar capacity last year, extending its run of annual additions above 1 GW to a third straight year and raising total installed solar capacity to 5,984 MW, ...

Bulgaria installed over 1 GW of solar for the third consecutive year in 2025 and is forecast to add over 2 GW this year thanks to a large pipeline of utility-scale projects.

A 16.2 MW solar power plant in Zdravetz, Bulgaria was expected to be completed in June 2012, with power being sold for \$0.30/ kWh in a fixed rate 20 year power purchase agreement.

Greek renewables company Terna Energy SA, primarily owned by Emirati firm Masdar, announced plans to develop a 130-MW solar photovoltaic park in southeastern Bulgaria.

Solar power generated 12% of Bulgaria's electricity in 2023. By the end of 2020 about 1 GW of solar PV had been installed. It has been estimated that there is potential for at least another 4 GW by 2030. By the end of 2024 about 3.9 GW of solar had been installed. On March 13, 2023, peak photovoltaics power was 30% of Bulgaria electricity gener...

Bulgaria installed over 1 GW of solar for the third consecutive year in 2025 and is forecast to add over 2 GW this year, according to a report from pv magazine. Official data shows the country ...

Rezolv Energy will develop the largest solar power plant in Bulgaria, right on the border with Romania. The 165-hectare, 229 MW plant will be located in the town of Silistra in northeastern Bulgaria, less ...

Bulgaria deployed 1,416 MW of solar "last year" (2025), marking its third consecutive year above the 1 GW threshold and pushing cumulative capacity to nearly 6 GW. The market is ...
