Should you leave your portable power station plugged in?

Experts recommend keeping batteries between 20-80% for everyday use. However, in emergency-prep mode, maintaining 100% readiness can outweigh long-term cycle optimization--especially if you live in storm-prone areas. Whether or not to leave your portable power station plugged in depends on your lifestyle and scenario. Let's look at common examples.

What is an outdoor Uninterruptible Power Supply?

An outdoor Uninterruptible Power Supply is a power solution designed for critical applications where it's essential that equipment stays running in harsh outdoor environments and significant temperature variations, where an ordinary UPS would fail. Trust TSi Power for these applications.

Should you keep your oupes power station plugged in?

If you live in an area with frequent outages, keeping your station plugged in ensures it's always ready. Models like the OUPES Exodus 1200 or Mega 2 provide reliable standby energy for lights, CPAP machines, or routers when power suddenly cuts out. Many professionals use OUPES power stations as uninterruptible power supplies (UPS).

Are oupes portable power stations safe?

The good news is that OUPES portable power stations are designed with advanced Battery Management Systems (BMS) to prevent overcharging, overheating, and electrical faults. This makes them safe to leave plugged in for extended periods without worry. Overcharge Protection: Once fully charged, the unit stops drawing current automatically.
