The large-scale battery energy storage system (BESS) will provide at least 250 megawatts (MW) of power. This is enough energy to power one-third of Canberra for two hours ...

Williamsdale BESS will deliver a key stage of the ACT Government's Big Canberra Battery ecosystem, helping the Territory reduce reliance on fossil fuels and achieve its 2045 net zero emissions target.

The ACT Government and Eku Energy have begun construction on the 250MW/500MWh Williamsdale Battery Energy Storage System (BESS), which will support the uptake of renewable ...

The government announced this morning that Eku Energy will develop, build and operate the battery energy storage system (BESS), which at 250MW/500MWh would be one of the largest of ...

Connecting to the Evoenergy electricity distribution network, the Williamsdale BESS is part of the ACT Government's Big Canberra Battery project. It will have the capacity to store enough renewable ...

SEI can tailor battery energy storage systems (BESS) solutions to maximise their versatility, reliability and efficient electricity storage capabilities for Australian communities.

The ACT Government in partnership with global energy storage leader Eku Energy, has today celebrated the start of the construction on the Williamsdale Battery Energy Storage System ...

The Williamsdale BESS is part of the ACT Government's Big Canberra Battery project. It further supports Canberra households in their use of renewable energy and the ACT Government's ...
