How much does a resale solar module cost?

For example, N-Type modules by REC listed for resale in May and July pushed up weighted average prices to \$0.411 and \$0.460 respectively. P-Type modules in September increased to \$0.311 as modules by Sirius PV, Solar4America, and Panasonic were remarketed. The same price increase was present in P-Type Bifacials for the month of December.

What are the best solar modules for the private sector?

Brands such as SMA, Fronius and SolarEdge offer highly developed solutions that ensure optimum energy feed-in. Precise dimensioning prevents power losses and maximizes efficiency. The combination of solar modules and storage systems is becoming increasingly popular, especially in the private sector.

Where can I buy a solar module?

Solar modules are available via specialized online marketplaces and from solar installers. For private individuals, it is advisable to seek advice from specialist companies, as they take care of installation and maintenance.

Do PV modules lose resale value?

For historical secondary market PV module pricing from 2020 through 2023, download the 2023 PV Module Price Index from EnergyBin's Resources portal. Overall, the price index shows that new PV modules don't tend to lose resale value in the U.S. secondary market unless their technology is older, such as Legacy POLY modules.
