The Governments of New Zealand and Vanuatu have signed a Partnership Arrangement to advance the Renewable Energy Solar and Storage on Efate and Tanna (RESSET) Project, a major initiative ...

Without reliable energy storage, hospitals lose refrigeration for vaccines, schools can't power digital classrooms, and fishing communities lose cold storage capacity.

The project aims to support the use of solar power and battery storage on the islands of Efate and Tanna, boosting Vanuatu's energy independence and climate resilience.

Vanuatu currently has one of the lowest electricity access rates in the world. Under the RESSET project, New Zealand will serve as the lead donor, providing the majority of funding for the ...

This article explores its strategic location, innovative technology, and how it aligns with global energy storage trends - while answering the burning question: Where exactly will this critical infrastructure ...

The primary hurdle for Vanuatu and its neighbors remains securing the necessary financing for large-scale renewable projects, grid modernization, and energy storage systems.

A hydropower project that works like a giant water battery, storing enough energy to power 50,000 homes during cyclone season. That's exactly what the Port Vila Front River Pumped ...

Project title: Enhanced Climate Resilience and Grid Connected Renewable Energy through Battery Storage
Project description: The project is a public private partnership in Port Vila, ...
