What is a containerized generator set? A containerized generator set is a fully integrated power generation unit housed in a shipping container, providing portable, reliable, and safe electricity ...

Originally launched for limited markets in 2021, the 40-ft containerized generator sets were engineered for easy transportation, simple installation and are stackable, offering up to 34% ...

We're excited to expand this pillar with the addition of Centum(TM) Force, the next generation of containerized generator sets that establish new benchmarks in footprint optimization, layout flexibility, ...

Container power generators are available with a rated capacity of 30 kVA to 3000 kVA. Depending on the asked performance and execution, the generators are mounted in soundproof, weatherproof ISO ...

We design and build container generator units, shipping container power units, and modular generator housing that meet the highest standards of safety and performance.

Integrated plug and play container packages are available for Type 2, 3, 4 and 6 engine generator sets with cooling, exhaust, and heat recovery systems; engine-generator controls and generator ...

Simply put, dual packs are two parallel generators in one ISO container: Two 500 kW generators could be paralleled to achieve a 1000 kW output, or two 625 kW generators to achieve 1250 kW. This dual ...

We offers containerized generator sets with CHP and Emission control system. With our genset containers offer optimal performance in various site conditions.
