In the Nordic countries (Denmark, Sweden, Norway & Finland), renewable energy (RE) already makes up more than half of the generation mix in each country. The high penetration of RE ...

The precondition for making decisions and shaping regulations in the energy sector is knowledge. Therefore, The Danish Energy Agency produces statistics, key data, projections, analyses, and ...

While the use of battery storage is on the rise, the current installed capacity remains relatively insignificant compared to hydro storage. To fully harness the potential of renewable energy, ...

Recognizing these factors, Copenhagen Energy strategically entered the US market, where we see substantial potential for further growth. The market entry marked a significant milestone within our ...

The attractiveness of electric storage is motivated by its ability to provide multiple grid-related and market services, as a response to an expected increase in the demand for system flexibility from new ...

Denmark's ambitious renewable energy targets--aiming for 100% clean electricity by 2030--are driving unprecedented demand for battery storage solutions. With wind power supplying over 55% of ...

Regional dynamics demonstrate energy storage markets reaching maturity. Explore this evolution and our analysis of the key global themes to watch in the year ahead.

The Danish market is yet to be effectively tapped for battery storage in grid management. The opportunity will unfold as the power system expands while phasing out all operational thermal ...
