Which solar companies do not incur import tariffs?

Other "Domestic" Suppliers: A few manufacturers with U.S.-based production or assembly - such as Hanwha Qcells (Georgia factories), First Solar (Ohio), Mission Solar (Texas), and Silfab (Washington) - do not incur these import tariffs on their U.S.-made panels. They have an effective price advantage now.

Which countries have been affected by tariffs on solar equipment?

Key U.S. allies saw more moderate tariffs (e.g. European Union 20%, South Korea 25%, India ~27%), and many others received the flat 10% rate (pv-tech.org) These tariffs took effect in April and immediately reshaped the cost structure for solar equipment imports.

How will tariffs affect solar panels & inverters in 2025?

In summary, as of April 2025 we see solar panel prices up by 20-40% (depending on origin), inverters up ~10-30%, and battery costs up significantly (~30% or more) compared to pre-tariff levels. These increases correlate directly with the reciprocal tariff rates imposed (34% on China, 36-49% on SE Asia, etc.), underlining the tariffs' impact.

How will the April 2025 tariffs affect solar equipment pricing?

Going forward, we will likely see continued realignment of supply chains and possibly negotiations or exemptions, but until then, the April 2025 tariffs are a key factor in solar equipment pricing - boosting domestic manufacturers' prospects while challenging project economics for import-reliant developers.

Why Energy Storage Costs Are Making Headlines (And Why You Should Care) Let's face it - battery prices are dropping faster than your morning coffee cools. The global energy storage ...

Calculate import duty and taxes in the web-based calculator. It's fast and free to try and covers over 100 destinations worldwide.

Calculate import duties, tariffs, and total landed costs instantly. Free tariff calculator for importers. Get accurate rates for any product from any country.

Rates start at a baseline of 10% and rise as high as 50%, depending on existing trade relationships. The policy reflects a shift toward more targeted and reciprocal trade measures, with some partners, ...
