Do solar installers need a license?

Some states require solar installers to obtain a separate, specialized solar contractor's license. In most cases, solar is a specialty classification under the general electrical or plumbing licenses and all appropriately licensed contractors can install solar systems without the solar specialty license.

Are solar photovoltaic installers safe?

Solar photovoltaic installers risk falls from ladders and roofs, shocks from electricity, and burns from hot equipment and materials while installing and maintaining PV systems. To reduce the risk of injury, PV installers must wear safety equipment, such as harnesses, gloves, and hard hats.

How do I become a solar photovoltaic installer?

There are multiple paths to becoming a solar photovoltaic (PV) installer, or PV installer. These workers typically need a high school diploma, but some take courses at a technical school or community college; they also receive on-the-job training lasting up to 1 year. Some PV installers learn to install panels as part of an apprenticeship.

Do you need a roofer to install solar panels?

Installation of solar panels may require the help of roofers and electricians. Solar photovoltaic installers risk falls from ladders and roofs, shocks from electricity, and burns from hot equipment and materials while installing and maintaining PV systems.
