This project is designed to support the Commonwealth of Dominica in developing and integrating clean, sustainable and low-cost energy. Through this \$38.5 million project, a new robust transmission ...

From Wednesday 30th April to Sunday 4th May, Dominica Electricity Services Ltd. (DOMLEC) will be conducting critical testing of a recently installed Battery Energy Storage System (BESS) at its Fond ...

Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh battery energy storage system (BESS).

This article explores how cutting-edge energy storage solutions are transforming the island nation's power infrastructure, reducing reliance on fossil fuels, and paving the way for a greener future.

A notable achievement is the upcoming launch of the first four-hour energy storage system linked to a solar project, set to be operational by mid-2025. This system will participate in the ...

Discover how Dominica is leveraging wind, solar, and battery storage systems to achieve energy independence while addressing climate resilience. This guide explores active projects, data-driven ...

It is being implemented by MASDAR, a leading player in sustainable energy, with French firm Smart Energy serving as the EPC contractor. This is more than a technology transfer -- it's a ...

The US\$50mn development in Dominica will support a 5MW/2.5MW-hours battery energy storage system that will aid the island's clean energy objectives. The system is forecasted to stabilise the ...
