If a national seismic network loses stations during an earthquake, trust erodes. That's where an Inverter Manufacturer with OEM/ODM support like TURSAN comes in.

IBC seismic certified electrical enclosures are industrial cabinets specifically engineered and tested to withstand earthquake forces, ensuring uninterrupted power delivery and structural resilience in ...

Eaton Seismic Cabinets are performance-tested to EIA-310-E, Seismic Zone 4 (NEBS GR-63-CORE) standards. The enclosures are loaded with simulated equipment and placed on a shaker table ...

For Optical Distribution Frame installations, DCX Seismic Cabinets are fully configurable, front-access cabinets that serve as a high-density fiber interconnect or the main building block for a large fiber ...

We work with companies to custom manufacture seismic cabinets to fit their requirements. Working with Juniper, we manufactured this custom seismic rack to fit their MX2020 router, which is a 45RU high. ...

Protect equipment in any environment, regardless of geographic location. The use of seismic-rated enclosures is recommended in areas where earthquake activity or excessive vibration is possible.

Fully seam-welded or knock-down/flat pack styles Custom battery racks, either fully welded or bolt-up Integrated thermal management as standard, including exhaust fans Custom backplates to ...

The Z4-Series SeismicFrame™ Cabinet System delivers robust seismic protection for critical infrastructure in Zone 4 seismic zones, meeting Telcordia GR-63-CORE requirements.
