It's all well and good making sure you include base isolation systems, state-of-the-art dampers, and that no heavy pipes are suspended precariously above your servers, but how do you ...

The rapid growth of hyperscale data center facilities has created a shortage of available power, resulting in interconnection queues that can stretch to 5 or more years.

We provide walk-in/non-walk-in energy storage containers, liquid cooling cabinets, marine energy storage containers and various non-standard energy storage products. Meet the requirements of ...

Explore our custom seismic solutions tailored for high-risk environments, providing specialized protection for critical equipment. Trust our expertise.

Canovate's seismic cabinets meet international standards and have passed rigorous earthquake resistance tests, ensuring data center equipment remains secure and infrastructure stability is ...

Backup generators, fuel supplies, and battery arrays should be housed in earthquake-resistant enclosures. Redundant systems must be physically separated to avoid simultaneous failure, ...

Our storage systems feature seismic-resistant, moment-resisting reinforcements, offering the strength and flexibility to evenly distribute seismic forces and absorb energy without collapsing.

Earthquake Defense offers Machine Mounts, Data Center Seismic Mounts, Base Isolators, & Multistory Isolators that provide protection from Seismic/Vibration impacts to infrastructure such as: buildings, ...
