Is EV adoption still a problem in Italy?

Despite policy efforts, EV adoption remains lackluster. As of June, battery electric vehicles accounted for only 6 percent of new car sales in Italy--well below the EU average of over 15 percent. Looking ahead, the broader EU plan to phase out new petrol and diesel car sales by 2035 will be reviewed next year.

Are electric cars good for the environment in Italy?

With air quality becoming a pressing concern, especially in urban centers like Milan, Rome, and Naples, Italians are increasingly aware of the environmental benefits of EVs and hybrids. In 2023, Italy recorded substantial growth in electric car sales, reaching nearly 10% of all new vehicle registrations. 3. Best-Selling Electric Car Brands in Italy

Why is Italy moving towards EVs & hybrids?

Italy has seen a significant shift toward electric and hybrid vehicles (EVs and HEVs) in recent years, driven by environmental concerns, governmental incentives, and advancements in car technology. The Italian government is committed to reducing carbon emissions, aiming for 55% fewer greenhouse gases by 2030 and a total net-zero goal by 2050.

Who makes electric cars in Italy?

Several automakers dominate the Italian electric vehicle market, providing consumers with options that meet different budget ranges, preferences, and performance requirements. Tesla remains a popular choice due to its brand recognition, advanced technology, and fast-charging Supercharger network across Europe, including Italy.

All three scenarios forecast an increasing penetration of electric vehicles, while the number of traditional ICE cars should see a gradual decrease. By the end of 2024, in Italy, the total cost for BEV ...

Italy has one of the lowest battery-electric vehicle (BEV) adoption rates in the EU, at only around 6 % of new car sales in June 2025, compared to more than 15 % across the Union.
