The number of green buildings and electric vehicles in Vietnam has surged over the past two years. As of Q3 2025, the country has more than 183,000 electric cars and 974 electric buses in ...

This policy in both Hanoi and Ho Chi Minh City is creating significant opportunities for electric vehicle (EV) companies, but the strategies needed to capitalise on them differ.

The Ministry of Science and Technology is set to introduce a National Technical Regulation for electric vehicle charging stations. This move aims to ensure safety, harmonize ...

The Ministry of Natural Resources and Environment will define new emission standards for existing vehicles, pinpoint areas requiring stricter restrictions, review land use for green transport, ...

Research to date has identified structural and psychological barriers that negatively affect adoption behavior, i.e., the intent to use or buy an electric vehicle.

Some issues that may affect the safety of EV users and other road users include vehicle safety specifications, vehicle operational safety, and electric safety. However, none of these technical ...

This report focuses on electric vehicles (EVs) such as: pure battery electric vehicles (BEVs), hybrid electric vehicles (HEV), and plug-in hybrid vehicles (PHEVs).

The manufacture and adoption of electric vehicles have been given preferential treatment by the Vietnamese government in order to reduce vehicle emission pollution. [1]
