What does the Union Budget 2026-27 mean for India's grid-scale energy storage?

Grid Scale Energy Storage: The Union Budget 2026-27 introduces exemptions on capital goods for lithium-ion battery manufacturing and sodium antimonate for solar glass, aiming to boost India's grid-scale energy storage and renewable energy integration, according to Union Minister Pralhad Joshi.

How will the Union budget boost India's energy sector?

The Union Budget is set to boost India's energy sector. It will accelerate grid-scale energy storage and integrate renewable energy sources. New Delhi: The Union Budget aims to accelerate grid-scale energy storage and enable seamless integration of renewable energy, Union Minister Pralhad Joshi said on Sunday.

What are the key aspects of energy storage in India?

This study, through comprehensive grid simulations, examines key aspects of energy storage in India, including required capacity, optimal locations, duration, technologies, costs, and policy framework, to meet growing electricity needs in a least-cost manner, while preventing the stranding of thermal assets.

How big is India's energy storage capacity?

97 GW/362 GWh. This represents substantial growth from India's current energy storage capacity of approximately 6 GW (including pumped hydro), underscoring the need for robust policy and regulatory support to accelerate storage deployment at this scale.

The Government of India remains committed to promoting clean and green energy solutions, and the BESS Scheme is a significant step towards achieving this vision. By harnessing the power of ...

Indian Budget 2026 Updates: Get live updates on Budget 2026 as Finance Minister Nirmala Sitharaman tables the budget tomorrow, February 1. Experts believe that Budget 2026 could ramp ...

The Budget 2025-26 sets a strong direction for energy reforms, but execution will be key; linking state borrowing to DISCOM reforms is strategic, though structural and operational improvements remain ...

The Union Budget 2026 places clean energy, especially solar power, firmly at the centre of India's growth and energy transition strategy. With a clear focus on scale, affordability, manufacturing ...

India has set a national target to meet 4% of its electricity demand with energy storage by 2030, translating to around 200-250 GWh of grid-scale storage capacity (Ministry of Power Order, 22 July ...

Union Budget 2026 prioritises infrastructure, critical minerals, storage, manufacturing, reshaping India's energy ecosystem beyond.

Grid Scale Energy Storage: The Union Budget 2026-27 introduces exemptions on capital goods for lithium-ion battery manufacturing and sodium antimonate for solar glass, aiming to boost ...

IESA welcomes Union Budget 2026 support for energy storage and batteries, while flagging gaps in recycling, refining and GST reforms.
