Data and Tools Find NLR-developed data sets, maps, models, and tools used for the analysis of advanced energy technologies.

The DOE Global Energy Storage Database provides research-grade information on grid-connected energy storage projects and relevant state and federal policies. All data can be exported to Excel or ...

Total Energy Comprehensive data summaries, comparisons, analysis, and projections integrated across all energy sources.

Reviews the current characteristics of a broad range of mechanical, thermal, and electrochemical storage technologies with application to the power sector.

This report describes the development of a method to assess battery energy storage system (BESS) performance that the Federal Energy Management Program (FEMP) and others can use to evaluate ...

Failure Data Analyses and Root Cause for BESS 25 Technical BESS Architecture, Components, and Functions 25 Component ...

The 2020 Cost and Performance Assessment provided installed costs for six energy storage technologies: lithium-ion (Li-ion) batteries, lead-acid batteries, vanadium redox flow batteries, ...

The global energy storage container market is experiencing robust growth, driven by the increasing demand for reliable and efficient energy solutions across diverse sectors.
