Is Togo a sustainable country?

Togo is a West African nation on the Gulf of Guinea known for its palm-lined beaches and hilltop villages. Efforts have been made toward improving sustainable agriculture in Togo, where 32 percent of the population lives below the poverty line.

Does Togo have a National Plan for reducing air pollution?

The United Nations Environment Program is supporting Togo to implement these standards nationally. Togo's most ambitious effort, however, is the National Plan for the Reduction of Air Pollution and Short-Lived Climate Pollutants which was adopted by the Minister of Environment, Sustainable Development, and Natural Protection in 2020.

Which projects addressed sustainable agriculture in Togo?

The USAID WAFP, or West Africa Fertilizer Program, which occurred from 2012-2017, is a project that addressed sustainable agriculture in Togo. It was meant to improve the supply and distribution of appropriate and affordable fertilizers in West Africa.

What is Togo's 'Projet transport durable &#224; Faible &#233;missions'?

In 2016, Togo launched the "Projet transport durable &#224; faible &#233;missions" to start making the country's transportation sector more sustainable and to lower emissions. This project included nationwide adoption of clean fuels and efficient vehicles as well as more efficient public transportation.

The environment is no longer treated as a constraint, but as an economic, social, and cultural lever of sovereignty. Togo demonstrates that an African state can shape its ecological ...

Togo has achieved significant development gains over the last decade, but progress is still held back by slow structural transformation and a large urban-rural divide.

Reducing highly potent but short-lived climate pollutants like methane, black carbon and HFCs is our best chance at avoiding runaway climate change. Here's how Togo is reducing emissions.

Support environmental initiatives by Saving Life and Environment. Join us in promoting health, education, and sustainability efforts.

Adding new greenhouse gases while increasing mitigation targets across sectors, Togo almost doubled their economy-wide emissions reduction target in their updated NDC, from 11.14% to 20.51%, relative ...
