-----

Picture this: A 45-ton excavator delicately lifting a crate of photovoltaic panels like a ballet dancer handling crystalware. This unexpected marriage of brute force and precision is rewriting the rules of ...

The Solmetric Module Lift is designed to safely and quickly transport a PV module to a roof. The device uses your existing fiberglass Werner or Louisville extension ladder.

By seamlessly connecting to a range of mini-excavators, this innovative system simplifies what can often be a labor-intensive process. With the Solar Panel Lifter, maneuvering and positioning solar panels ...

This model is designed for light works and for lifting solar panels onto roofs and terraces. Driving group wheels enable a fast and easy placement in any installation.

The Solar Panel Lifter system allows easy installation and manipulation of solar panel modules in field via attachment to a variety of mini-excavators. This system reduces worker fatigue and wind gust ...

Specially designed with a custom carrier that functions as a cargo receptacle, GEDA's solar panel lift is a space-saving way to reach inaccessible loading areas.

Our solar panel lift makes your solar installation jobs more efficient than ever before. Lift up to 500 lbs worth of panels and material with just the push of a button.

The Solar Panel Lifter system allows easy installation and manipulation of solar panel modules in field via attachment to a variety of mini-excavators. This system reduces worker fatigue and wind gust ...
