UK architecture studio Foster + Partners has released designs of a solar panel-lined tower for use on the moon as part of a project with NASA and 3D printing studio Branch Technology.

As part of NASA's Small Business Innovation Research (SBIR) Phase I program award, Foster + Partners and Branch Technology are designing and optimizing a 50-metre-tall tower, which ...

Foster + Partners and Branch Technology are designing and optimising a 50-metre-tall tower, which could support solar panels to enable power infrastructure for the Lunar South Pole."

Foster + Partners, a UK-based architecture studio, has revealed plans for a solar energy tower designed specifically for the moon. This ambitious project is a collaboration between Foster + ...

In the quest to establish sustainable outposts on other worlds, power generation stands as a formidable challenge. A bold new project from Foster + Partners, in collaboration with Branch ...

Foster Solar is an operating solar photovoltaic (PV) farm in North Scituate, Providence County, Rhode Island, United States.

Partnering with NASA and 3D printing studio Branch Technology, Foster + Partners previewed this design to showcase how critical future power and communication networks will be on ...
