The model combining photovoltaic power generation and animal husbandry, pioneered in Talatan, offers a new approach to desertification control and clean energy development.

Amid the vast expanse of the Gobi Desert in Jinta, Gansu Province, rows of solar panels are transforming once-hostile sands into a thriving "blue ocean"...

In the heart of the Gobi Desert in Jinta, Gansu Province, a remarkable transformation is underway. Once a barren and hostile landscape, the desert is now home to vast rows of solar panels ...

Discover how Trinasolar's solar technology is transforming the Gobi Desert's sands into a thriving hub of renewable energy, paving the way for a sustainable future and ecological restoration.

Its products and solutions are widely adopted and recognized by customers worldwide, with extensive expertise accumulated in delivering tailored solutions for desert and arid environments.

It systematically demonstrates the power generation capability, weather resistance, and comprehensive performance of DesertBlue modules in deserts, Gobi areas, and wastelands through simulations ...

This massive solar installation has an installed capacity of 3 gigawatts (GW) and consists of over 5.9 million solar panels. The plant is expected to generate approximately 5.7 billion kilowatt ...

A new study conducted at the Wuwei photovoltaic plant, a GMPV system located in the Gobi desert in Gansu province, has provided valuable data on how these installations affect the ...
