What is guest room management system?

Guest Room Management System receives data from the HRC and provides centralized visibility and control of guest rooms and other services like BMS, PMS, and door lock. The GRMS enables the Operator to see occupancy and DND/MUR status, monitor and control conditions in the room, and troubleshoot space and more. problems remotely.

How can a guest room management solution help you save money?

Guest room management solutions help you reduce those costs. Saving 10 per cent would have the same financial effect as increasing the average daily room rate by \$0.62 (approximately EUR0.56) in limited-service hotels and by \$1.35 (approximately EUR1.21) in full-service hotels.

What is a guest room EMS?

A guest room EMS that connects through your current wifi network to maximum efficiency and energy savings. Energex is the first Wi-Fi room controller and gateway in one smart device. Energex is the first hospitality Wi-Fi smart thermostat that connects directly to the cloud from the guest room.

What is Schneider Electric Guest Room management?

Schneider Electric guest room management solutions use a combination of presence detectors and door status data to automatically detect whenever a room is unoccupied, adjusting room conditions while guests are away and quickly restoring those settings as soon as they return. Our solutions drive greater hotel efficiency and savings.
