Discover off-grid shipping container homes! Eco-friendly, self-sufficient living with solar power & more. Unplug & thrive today!

We have cleverly combined solar panels, shipping containers, and homes to offer an eco-friendly, convenient, and affordable new living solution.

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

With a carefully sized solar array, intelligent water systems, and a container shell customized for energy performance, even the most remote sites can offer a comfortable -- and sustainable -- modern life.

This article looks into the intricacies of integrating solar power systems into shipping container homes, exploring the benefits, challenges, and practical steps to create a self-sufficient, green living space.

Whether you want to reduce the electricity bill, build reliable power supply for remote residences, or have backup power in the event of a power outage, an efficient off grid solar battery ...

This is a detailed walk-through of the planning and installation of our 3kW - 5kWH - 120V off-grid solar system that powers a rehabbed shipping container.

Split between solar, battery, or generator backup for your home? Anker Solix E10 promises to do all three for you.
