Bosnia and Herzegovina (BiH), a country of around 3.5 million people, is currently a net exporter of electricity - the only one in the Western Balkans. More than half of its electricity generation capacity ...

In 2009, world pumped storage generating capacity was 104, while other sources claim 127 GW, which comprises the vast majority of all types of utility grade electric storage.

Coal-fired and hydroelectric plants contribute almost all of the electricity generated and BiH currently exports power. It has sufficient lignite reserves to justify investing in modernizing its ...

Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your ...

Bosnia and Herzegovina has 127 power plants totalling 5,342 MW and 5,957 km of power lines mapped on OpenStreetMap. If multiple sources are listed for a power plant, only the first source ...

Data and information about power plants in Bosnia and Herzegovina plotted on an interactive map.

List of power plants in Bosnia and Herzegovina from OpenStreetMap

SDGs only apply to developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Cha
