MITEI's three-year Future of Energy Storage study explored the role that energy storage can play in fighting climate change and in the global adoption of clean energy grids.

By deploying its renewable energy battery storage systems, VFlowTech Africa will enable the storage of energy generated from variable or intermittent energy sources such as solar or ...

London and Kinshasa, November 24, 2021 - The Democratic Republic of the Congo (DRC) can leverage its abundant cobalt resources and hydroelectric power to become a low-cost and low ...

The client, Kivu Green Energy (KGE), desires an onsite islanded microgrid, comprised of solar and battery storage, to provide clean and reliable electricity to their office space for business operations.

To support large regions increasingly dependent on intermittent renewable energy, Stanford scientists are creating advances in fuel cells, hydrogen storage, flow batteries, and traditional battery cells for ...

The Democratic Republic of Congo battery precursors, says research company BloombergNEF in a report, but the country must move beyond the simple export of raw materials.

Portable energy storage products are a safe, portable, stable, and environmentally friendly small energy storage system that uses built-in high energy density lithium-ion batteries to provide a stable AC and ...

Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh battery energy storage system (BESS).
