How much does a solar battery cost?

Adding an energy storage battery to a residential solar panel system typically costs \$7,000 to \$18,000. Some smaller batteries cost just a few hundred dollars, while premium systems can exceed \$30,000. The final price depends on what you buy and who installs it. This guide breaks down solar battery costs in plain language.

How much does a solar system cost?

Switch to solar with a system built for you. Adding an energy storage battery to a residential solar panel system typically costs \$7,000 to \$18,000. Some smaller batteries cost just a few hundred dollars, while premium systems can exceed \$30,000. The final price depends on what you buy and who installs it.

Can you add battery storage to a solar panel?

The good news is that it's entirely possible to add battery storage to an existing solar panel setup. So-called "storage ready" systems are already equipped with an inverter that can easily direct excess power into a battery. But even if your system wasn't designed with storage in mind, you still have options.

Should I add a battery to my solar system?

While incentives and rebates can help reduce costs, it's still important to carefully weigh the advantages and disadvantages before buying. The two biggest advantages of adding a battery to your solar system are long-term savings and reliable backup power during grid outages.
