What is a collapsible shipping container?

Shippers are demanding improved efficiencies and sustainability throughout their supply chains. COLLAPSECON is the collapsible shipping container pioneering the future of global trade. It's practical and rigid design saves on space, cost and handling, and helps to significantly reduce industry emissions.

How much does it cost to deliver a container?

Buying the container is only step one. Real costs often come from delivery, setup, and compliance. Example: Delivering a 40ft container from the Port of Newark to Pittsburgh (370 miles) may cost $1,600+ in transport and unloading fees. A flatbed truck can only deliver if the ground is ready. If not, you'll need site prep:

How to connect two shipping containers?

However, whether you weld, bolt, or plate them, the process starts in the same way. The first step in connecting two shipping containers is to remove one long side from each container. For shorter containers, you should leave 350mm at either end of the space to preserve its structural integrity.

Should you buy a shipping container?

Shipping containers have become more than steel boxes for global trade. Today, they're used for homes, offices, storage, retail spaces, and logistics solutions. But if you're ready to buy one in the U.S., you'll quickly realize: The price on the tag is only the beginning.

Many collapsible containers require 3-4 people and a crane to operate, often taking 15-20 minutes per unit to collapse, usually by lifting or pushing the container.

These numbers can vary widely depending on your property"s location, access, terrain, and local labor rates, but the breakdown below should give you a solid starting point.
