What is the main source of electricity in Solomon Islands?

In Solomon Islands, electricity is primarily generated through the combustion of fossil fuels. The demand for power in Honiara, the capital, has been increasing rapidly since 1996, but the power plants have not been able to keep up with the demand.

Is power in Solomon Islands too expensive?

Peter Bae says power in Solomon Islands is too expensive. (ABC News) Peter Bae has a full-time job in finance. He earns a decent wage -- above the average in his home country Solomon Islands.

Why are electricity prices so high in Solomon?

According to Martin Sam, the acting chief executive of state-owned Solomon Power, the country's energy authority, the causes of the high prices are "complex". He says the country's geography, with a population of 700,000 spread over hundreds of islands, is one cause. The other is the source of electricity, he said.

What is the power generation capacity of Solomon Islands?

The power generating capacity of the Solomon Islands is currently 10.2 MW, which is equal to its peak load capacity. One mining company in the Solomon Islands generates its own electricity with a power capacity of 11 MW and a peak load of 8 - 9 MW.

The Solomon Islands has no indigenous sources of natural gas or oil and lacks oil-refining facilities. Therefore all of the country's oil and gas requirements must be imported.
