What is the solar awning?

The solar awning is part of a whole range of solar photovoltaic products at Mitjavila (Solar Pergola, Carport, Autonomous Solar Kit ...). Find the solar solution that best suits your project.

Where can I install a solar awning?

Anywhere you would like shade is an opportunity to install a solar array in the form of a canopy or awning. If you have no building skills, there are contractors who specialize in solar canopies. If you are a DIYer, there are prefab kits available in both metal and wood frame canopies. If you are hardcore, you can do it all on your own.

How to install a solar awning or photovoltaic pergola?

The solar awning or photovoltaic pergola is the ideal structure for installation on the openings of a private or commercial building. The roof does not come into play. The installation is done in landscape only. The panel is attached with anchors in three points on the bracket (standard).

What are the benefits of solar awnings?

You will be able to preserve the coolness of your house thanks to the solar awning or to make a sheltered area for your entrance. The solar awning makes it possible to take the step to self-consumption. It will allow you to produce electricity that you can consume on the spot.

I am getting an outdoor rated inverter+battery to install on an outdoor wall. However the manufacturer recommends keeping it out of direct sunlight. What are my DIY options here? I can't ...

The panels can be arranged in any configuration to accommodate the homeowner's requirements. A single row of panels can create a shallow awning along an entire wall of a home.

The increase in the cost of electric energy coupled with the lower cost of photovoltaic panels offers great prospects for photovoltaic installations as a solar awning.
