SINGAPORE - The infrastructure division of Keppel will work with Chinese tech giant Huawei International to design and develop solar photovoltaic (PV) systems and battery energy ...

Keppel Infrastructure Division has signed a Memorandum of Understanding (MoU) with Huawei International to co-develop solar photovoltaic (PV) systems and battery energy storage ...

Through this partnership, we will harness Huawei's digital power technologies and Keppel's deep expertise in energy infrastructure to enhance the reliability and seamless integration of ...

This large-scale ESS marks the achievement of Singapore's 200MWh energy storage target ahead of time. It will complement our efforts to maximise solar adoption by storing and delivering energy given ...

An energy storage system with higher energy density is needed in the 5G era. Intelligent lithium batteries that combine cloud, IoT, power electronics, and sensing technologies will become a ...

Keppel's Infrastructure Division signed a non-binding memorandum of understanding with Huawei International to co-develop renewable energy solutions, focusing on photovoltaic (PV) ...

In December 2022, the 200 MW/285 MWh energy storage system (ESS) project on Jurong Island, constructed by Singapore's Sembcorp Industries, was officially launched. The project ...

Singapore has surpassed its 2025 energy storage deployment target three years early, with the official opening of the biggest battery storage project in Southeast Asia.
