Aaron and Roy discovered their technology at the Electrochemical Energy Storage and Conversion Laboratory (EESC), led by Matthew Mench, Dean of the Tickle College of Engineering. ...

Aaron Gordon, an experienced civil and structural engineering consultant, is actively working with leaders in the emerging hydrogen market to implement storage and fueling facilities across the ...

Under the umbrella of JCDREAM, Aaron has led the development of the Consortium for Hydrogen and Renewably Generated E-Fuels (CHARGE), which supports the growth of the regional hydrogen ...

This tool was designed to not only allow for understanding key trade-offs, but also to have a seamless integration with the HSECoE fuel cell and detailed hydrogen storage system models and to evaluate ...

CHARGE envisions a robust, equitable and well-connected hydrogen economy built on sustainable material supply chains. Prior to JCDREAM, Aaron specialized in energy storage, nanotechnology ...

Aaron is currently the Technical Director of Hydrogen Energy at Air Liquide Advanced Technologies US in Houston TX. He has published numerous articles on hydrogen safety and serves on many codes ...

Energy Vault<sup>®</sup> is proud to help lead the charge towards global #decarbonization with H-VAULT, the world's first hybrid Battery + Hydrogen solution for ultra-long duration energy storage.

This comprehensive review paper provides a thorough overview of various hydrogen storage technologies available today along with the benefits and drawbacks of each technology in ...
